8 Superb Asters for 50 cts.

Violet King. The King type of asters with their long narrow petals and fine graceful forms are always popular. However none of them have been received with as much enthusiasm as the Violet King and none can make a more attractive display.

Red Rose Beauty Aster. These come into bloom after most others are through and makes pretty rounded bush 2 to 3 feet tall which is loaded with immense flowers on long stems. Invaluable for cut flowers as they come at a time when most others are through blooming.

Mikado Pink. The large fluffy twisted forms of Mikado asters have always made them a popular favorite. None are more charming than the delicate pink.

Lavender Gem. This is an improved form of the Crego or Comet type with massive flowers beautifully incurved and twisted. A handsome cut flower that always merits admiration.

Shell Pink Ostrich Feather. The long narrow petals which are beautifully twisted and incurved have made the Ostrich Feather one of the most artistic of asters. The color is a soft glistening pink.

Sunshine Asters. Very attractive and graceful. Plants are well branched and carry an abundance of artistic flowers in many colors. Outer petals long and narrow with tubular ones in center bearing a four pointed star.

Elegance Aster. A class of single asters that work up very prettily in bouquets.

Heart of France. Heart of France opens red as the purest ruby, deepens with age and retains its remarkable beauty to the very end. The petals appear strikingly changeable, showing now a glow and sheen quite unique, now a soft warm velvety texture. In any light, natural or artificial, Heart of France is startlingly beautiful and will command instant admiration.

One Packet of Seed each of above Asters, shown on Front Cover, mailed for 50 cts.

Vegetable Specialties

The following varieties are improved strains of standard vegetables that have by repeated trials proven themselves superior to other varieties. The majority of new vegetables which are sold at a high price simply because they are new are soon found to be inferior to the best standard sorts.

Glory Cabbage

Denmark seems to be the ideal and natural place for perfecting cabbages. They often get the strains so perfect that the heads all look as though they were run in the same mould. Their main specialties are Golden Acre, Copenhagen Market, Glory and Danish Ball Head. These types do best when grown from Danish seed. We procure our seed from the most reliable Danish growers and they cannot be excelled in quality.

Glory Cabbage

A valuable and popular second early cabbage producing large, handsome, white, solid heads in August and September. Coming into market ahead of the ordinary winter sorts, they usually command a good price. Heads are about as large and solid as the Ball Head and when stripped of outer leaves present a beautiful appearance in market. A uniform grower and only about 10 days later than the Wakefield. Pkt. 8c; ½ oz. 18c; oz. 30c; ¼ lb. \$1.00; lb. \$3.40.

Beet—Improved Detroit Dark Red

Golden Acre Cabbage

This early round headed Cabbage is the most desirable sort for market gardeners and home uses. It matures 10 to 12 days earlier than Copenhagen Market. Plants are compact with short stems. Since the outer leaves are very restrained, the plants may be set from 12 to 14 inches apart in the row. The heads, maturing in about 75 days, have an average weight of six to eight lbs. and seldom, if ever, burst. The regularity in shape and size of Golden Acre growing in a field never fails to attract attention. Pkt. 10c; ½ oz. 25c; oz. 40c; ¼ lb. \$1.25; lb. \$4.00.

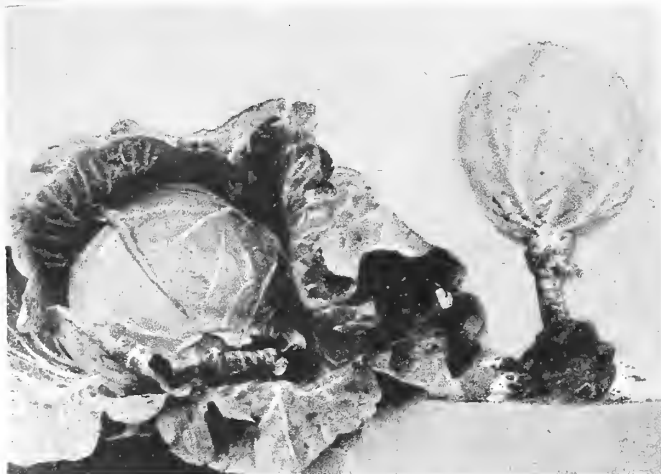

Kissendrup Cabbage

This is our best red Cabbage. The heads are large and uniformly round, dark red, solid and smooth. Pkt. 10c; ½ oz. 20c; oz. 35c; ¼ lb. \$1.00; lb. \$3.50.

Danish Ball Head Cabbage

Our special strain of Danish Ball Head Cabbage is grown by the best growers in Denmark and can not be surpassed in quality. Prices and description will be found on the regular Cabbage pages.

You can pay others more for the seed but you cannot get better quality. Pkt. 7c; ½ oz. 18c; oz. 30c; ¼ lb. 95c; lb. \$3.50.

Cabbage—Golden Acre

Beet—Improved Detroit Dark Red

The old strain of Detroit Dark Red Beet was considered among the best extra early sorts for home use or market. This strain has had every objectionable feature removed so that our new Improved Detroit may be said to be of perfect shape, deep dark red color, extra early and even in maturing. The quality is very sweet and tender. Its handsome color and shape always commands the best price on the market.

This strain of Detroit Dark Red is as perfect as it can ever be grown. Roots are globe shaped, very smooth and of medium size; skin dark red, flesh intense deep red without zones, very tender and sweet. Pkt. 8c; oz. 15c; ¼ lb. 35c; lb. \$1.00.

Bush Beans, Unrivalled Wax

Very Productive Early Market Sort

This Bean is becoming more popular every year as a heavy yielding market variety. Plants of medium size, robust and very resistant to disease, loaded down with pods 5 to 5½ inches long, semi-round, but quite fleshy and tender with small seeds. The color of the pods is a rich yellow. Immensely productive, of attractive appearance and practically stringless, combined with fine quality and disease resistance. For market it is a superior Bean and as a home-garden sort it can be highly recommended. Pkt. 6c; ¼ lb. 15c; lb. 45c; 3 lbs. \$1.20; 6 lbs. \$2.15.

Bush Beans—Earliest Butter Wax

This earliest Wax Bean is a heavy yielder of long, flat, yellow pods which are tender, brittle and of fine texture. This Bean is absolutely rust-proof, stringless and a heavy yielder. It can be placed on the market ahead of all other Wax Beans. Pkt. 7c; $\frac{1}{4}$ lb. 15c; lb. 40c; 3 lbs. \$1.10.

Sweet Corn—Early Golden Sunshine

This is the earliest of the Golden Bantam type, reaching maturity ten days earlier than Golden Bantam. Ears are 6-8 inches long and contain 12 rows of broad, yellow, sweet kernels. The stalks are small, but produce well-filled ears about a foot from the ground. This is recommended as an early market variety. Pkt. 10c; $\frac{1}{4}$ lb. 20c; lb. 60c; 4 lbs. \$2.00; 10 lbs. \$4.00.

DeLue's Golden Giant Sweet Corn

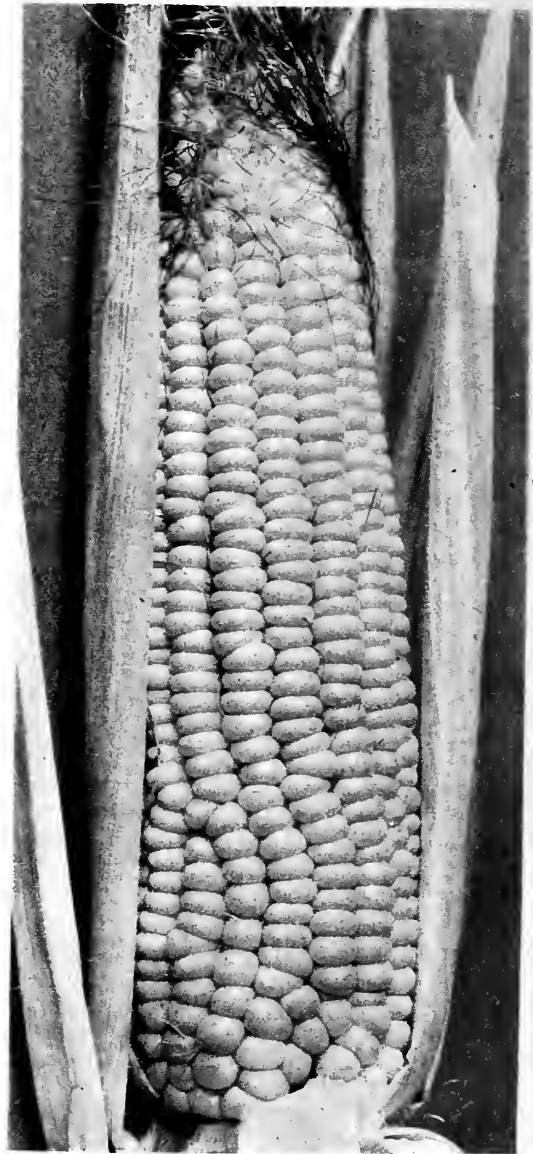

Extra Large Early Corn—Finest Quality—Beautiful Yellow Color—Great Producer

De Lue's Golden Giant excels all other varieties in size, productiveness and quality, and all of the late varieties in quality and early maturity. It is the one corn for the market gardener who wants the greatest amount of the highest quality corn in the shortest period of time from the smallest piece of land. It is because of the extreme tenderness, combined with the exquisite rich sugary flavor, that the Golden Giant has become the standard of perfection for Sugar Corn. Pkt. 10c; $\frac{1}{4}$ lb. 15c; lb. 45c; 3 lbs. \$1.15; 6 lbs. \$2.10. By mail postage paid.

Bush Beans—Earliest Butter Wax

THE GARDENER, by L. H. Bailey. You get full advantage of Dr. Bailey's unequalled knowledge and experience in this book. It tells how to grow flowers, vegetables and fruits from the time of planting through to maturity. Special articles on different types of gardening. Information that is easy to find and simple to use. 116 illustrations, 260 pages. \$2.00.

Sweet Corn—DeLue's Golden Giant

Cauliflower—Deposit Surehead

Deposit Surehead Cauliflower

Large, Pure White Heads, Sure to Head

A little later than Snowball, producing large white heads of unsurpassed quality. It will stand dry weather as well as or better than any other sort and rarely ever fails to produce a good crop. 75 seeds 5c; $\frac{1}{4}$ oz. 30c; $\frac{1}{4}$ oz. 65c; oz. \$2.10; $\frac{1}{4}$ lb. \$7.00.

Witloof Chicory

Witloof Chicory is one of the finest of all winter salads and is considered a great delicacy in French restaurants, etc. Roots may be grown same as Parsnips or Carrots. Lift roots in fall, cut off tops and store in soil or sand till wanted. Make rich bed in cellar, greenhouse or where temperature is 60 degrees or more and plant few at a time as wanted during winter. Cover growing plants with old cloth or carpet to keep dark. Heads are ivory white and large as Cos Lettuce. Delicious either raw or with French dressing. Pkt. 5c; oz. 20c; 2 ozs. 35c; $\frac{1}{4}$ lb. 50c.

Have used your seed for the last four years and like them better than others.

J. A. Weinberger, West, Texas

Your seeds are the best of any I have ever been able to get.
Mrs. Chas. Vogler, Advance, N. C.

Golden Plume Celery

Golden Plume Celery

The earliest and handsomest Celery grown. A new variety of Celery. The plants are of strong growth and produce thick and heavy stalks with a well-blanching solid heart. It is considered by many gardeners absolutely the earliest maturing Celery grown. It is large, vigorous, and appears to be immune to blight and rust. Highly recommended on account of its ease of culture—it requires no banking. Its attractive appearance when fully matured is most inviting; the foliage is creamy yellow, and the stalks creamy white, becoming almost white at the base. It is entirely devoid of any ribs or fiber, and it is brittle, tender, and deliciously flavored. Pkt. 10c; ½ oz. 35c; oz. 60c; ¼ lb. \$2.00; lb. \$7.00.

I was much pleased with the Aster seed I purchased from you last year. They were certainly the most I ever had. Everybody admired them. Perennial seed came up good.

Miss M. Cordes, Hillsdale, N. J.

Longfellow Cucumber

Carrot—New Coreless

Earliness and Quality—For Market and Home Use

An early variety of superior flavor and without core, highly recommended for market and home use. It is a half-long, cylindrical, blunt-pointed variety, with a very small tap-root and small, fine top. The shape and size are extremely uniform, averaging 6 to 7 inches in length and 1½ inches in diameter, clean-skinned, smooth and easily pulled. The color is a rich red-orange, and its flavor is of the finest. You will enjoy the superior quality of these carrots on your home table. Pkt., 10c; oz., 20c; ¼ lb., 60c; lb., \$1.45, prepaid.

MUSK MELON

Golden Hearts or Hearts of Gold

Golden Hearts is a medium early Melon, and ripens 6 to 8 days ahead of our Orange Cream. The flesh is thick, very tender and of a beautiful golden salmon color. It is of excellent flavor, being very sweet and delicious. It ripens clear to the skin. The Melons are well ribbed, and are covered with a dense netting of grayish color. The thin rind is a rich, dark green color. They are nearly round, and average a little more than 5 inches in diameter and weigh about 1¾ pounds apiece. The Melons grow very uniform in size, the vines very productive. The fruits set early and cluster about the hill, as many as twelve fruits have been found to the vine. Golden Hearts is an excellent shipper, and is so good that the hotel trade inquires for them, taking all they can get. Ripe fruits in 70 days. Similar to Hoodoo. Pkt. 8c; oz. 15c; ¼ lb. 50c; lb. \$1.50 prepaid.

Early Lake Champlain Musk Melon

Lake Champlain is a medium-sized Melon, nicely netted, flesh deep, sweet and melting, of golden yellow color. The plant is very vigorous and healthy, setting and ripening Melons even under adverse conditions which totally destroyed other varieties. It is a marvel of productiveness.

There have been other early Melons—and other varieties that are hardy and vigorous—but there is none besides Lake Champlain that combines those characteristics with the quality of the late maturing sorts. Pkt. 10c; ½ oz. 15c; oz. 25c; ¼ lb. 70c; lb. \$1.75.

Hales Best Musk Melon

Salmon Flesh. The earliest and finest Melon grown. This is the Melon that made such a sensation in the Imperial Valley, over 75 per cent. of the Melons being this wonderful variety. The flesh is of exceptional thickness, shape oval with heavy netting. Its greatest value is its extreme earliness and wonderful flavor. Pkt. 8c; 2 pkts. 15c; oz. 20c; ¼ lb. 50c; lb. \$1.25.

CUCUMBERS

Longfellow Cucumber

The fruit averages 12 to 16 inches in length by about 2½ inches diameter, and is borne early and in real abundance despite its great length. One of the very few Cucumbers which, when grown outdoors, resembles the hothouse type; holding its dark green color until the last, and being in all other respects equally desirable. Pkt. 10c; oz. 25c; ¼ lb. 65c; lb. \$2.25.

Staying Green

Staying Green or Always Green Cucumber is considered by many market growers the best green sort grown and holds its bright color longer and better than other sorts. Pkt. 5c; oz. 15c; ¼ lb. 35c; lb. \$1.00.

“Vaughan”

The Vaughn is as great an improvement over the Davis Perfected as that was over the old Long White Spine types. Being very prolific and uniform in shape makes it an ideal American sort. 12 to 15 inches in length. Pkt. 10c; oz. 35c; ¼ lb. 90c; lb. \$3.00.

White Spine

A very perfect strain of extra long white spine of uniform handsome appearance. An ideal sort for market or home use. Very long, smooth and of exceptionally good quality. Pkt. 6c; oz. 15c; ¼ lb. 45c; lb. \$1.40.

Pepper—Harris Early Giant

Princess Juliana Spinach

Large, Crumpled Dark Green Leaves, Suitable for Summer or Autumn Planting

The Princess Juliana Spinach is of the long season type with large, crumpled, rich, dark green leaves. It is valuable either for spring or autumn planting. We are convinced that the Princess Juliana Spinach will become the most popular variety on the market, not only for its rapid, uniform growth and delicious and tempting flavor; but also because it remains in prime condition longer before bolting to seed than any other sort. Pkt. 7c; oz. 15c; ¼ lb. 40c; lb. 95c.

TOMATOES

New Marglobe

The New Wilt Resistant Tomato

Its fine appearance, great productiveness, deep globe shape, fine scarlet color and superb table qualities is giving it first place wherever it is known. A very heavy yielder, bearing fine, big clusters of large, perfect globe-shaped fruit in great abundance. The Tomatoes are heavy, meaty and almost coreless. In color it is a most beautiful scarlet, ripening well up to the stem. A very productive variety suitable for truck growing, shipping and canning. For the home garden we like it very much. Marglobe is a medium early sort; the plants are of robust and erect growth, its foliage shading the fruit and preventing sun-scald. Marglobe is resistant to "nail-head rust." Ripe 10 to 12 days later than Earliana. Pkt. 10c; oz. 45c; ¼ lb. \$1.35; lb. \$4.50; prepaid.

Albino or White Beauty Tomato

We have at last been able to propagate a white Tomato of good quality. The New White Beauty contains absolutely no acid and so will make Tomatoes agreeable to thousands of people who have heretofore avoided them on account of the acidity. White Beauty is ivory-white in color, showing no trace of red and the flesh is almost paper white. It grows about as large as Stone. Pkt. 15c; 3 pkts. 35c; oz. 60c; ¼ lb. \$2.00.

Your seeds are always good and grow strong plants.

Mrs. John Arnold, Pittsburgh, Pa.

I have used your seeds for 20 years and never found their equal.

Mrs. Wm. Troupe, Morenci, Mich.

Harris' Early Giant Pepper

A very large, sweet Pepper that will produce good crops in the northern parts of the country. Harris' Early Giant is not only very large, but the plants produce enormous yields and the Peppers mature earlier than any other very large kind with which we are acquainted.

The plants are of vigorous growth, often being 18 to 24 inches tall, and covered from top to bottom with enormous Peppers. These Peppers are so large that only forty-five, as picked from our field, filled a bushel crate. It takes only 21 to fill a 14-quart basket. The Peppers are 5 inches high and 3½ inches through; deep green turning to brilliant red. Flesh thick and of a very sweet, pleasant flavor. This will be found a very valuable Pepper for the home garden and a profitable one for market. Pkt. 10c; ½ oz. 35c; oz. 65c; ¼ lb. \$2.00; lb. \$7.50 prepaid.

2 Grand Peas

Laxton's Progress

Extra Early—Dwarf—Largest Pods

The vines grow 15 to 18 inches high and the pods are 4 to 4½ inches long, of deep green color, well filled with dark green peas of highest quality. It is a true English Marrow Pea with very broad, pointed pods averaging eight to nine peas of delicious flavor. Pkt. 8c; lb. 38c; 3 lbs. \$1.10; 10 lbs. \$3.00.

New Hundredfold

Early—Dwarf—Large Pods

Hundredfold is the best flavored and one of the largest podded dwarf-growing sorts in existence. It is ready about three days after the earliest sorts, and bears an enormous crop of handsome, dark green, fairly broad and pointed pods, four inches long, containing about eight large, dark green peas of excellent quality. Pkt. 6c; lb. 38c; 3 lbs. \$1.10; 10 lbs. \$3.00 prepaid.

Prizetaker Onion

Among large Onions this one is exceptional for size and beauty; it is of the same type as the large Spanish onions, imported and sold for high prices. American-grown seed has become thoroughly acclimated through many years of very careful, painstaking culture. Prizetaker is a yellow globe that matures to great size under right conditions; it requires a long season and should be started early in hotbed. When properly ripened it is a good keeper. Pkt. 8c; ½ oz. 15c; oz. 25c; ¼ lb. 70c; lb. \$2.00.

Early Bird Radish

Most Profitable Market Variety, Quick Maturity—Rich Color—Perfect Shape—Exquisite Quality

This Radish has been bred up to a point that will be hard to surpass. It is a very early and quick growing Radish, fit to pull in 16 to 20 days. Its strikingly rich scarlet color attracts attention everywhere, while the flesh is snow-white, always crisp, juicy and mild. In shape slightly elongated globe. Pkt. 5c; oz. 10c; ¼ lb. 25c; lb. 75c.

Tomato—Marglobe

New Muskmelon, Sugar Rock or Honey Rock

A new type melon which will create as great a sensation as our celebrated Lake Champlain. Sugar Rock is known as the most profitable market melon in the melon growing districts of Michigan, Ohio and Indiana. It is of superior flavor, a great shipper and commands the highest prices.

Sugar Rock has four characteristics which are outstanding. These are: first, quality—second, productiveness—third, ability to stand shipping and handling—fourth, striking appearance. This melon has deep orange flesh with a flavor different from other sorts, which can only be appreciated by tasting.

Sugar Rock is one of the most prolific varieties grown. Five to seven perfect fruits are produced on one vine and often more. The rind is so tough and the flesh so firm that they can be allowed to ripen on the vine and still ship well. The fruits are oval, medium in size and not ribbed. The ground color is light golden yellow, overlaid with gray netting. Pkt. 10c; oz. 25c; ¼ lb. 75c; lb. \$2.50.

California Wonder Pepper

Large and Smooth—Mild and Sweet—Heavy Cropper.

The fruits are blocky or square shaped, slightly broader at stem than at nose, and exceptionally free from roughness. The size is immense, being 4 to 4½ inches average, and frequently weigh a pound. Plants are sturdy, somewhat spreading and carry from 6 to 9 fruits at a setting, which are ready for market as early as the second early sorts. Flesh is thick and fruit is sweet, crisp and tender. Pkt. 10c; ½ oz. 25c; oz. 45c; ¼ lb. \$1.65, postpaid.

Sunnybrook Pepper

An Improved Tomato Pepper.

A most remarkable new pepper for the home garden as well as for market. The plants grow 15 inches tall and measure about 22 inches in diameter. The branches, laden with clusters of fruits, bend down under the heavy weight of the peppers.

The individual fruits run from 2½ to 3 inches in diameter and they are from 2 to 2½ inches deep from the stem to the blossom end. The skin is smooth, glossy, and of a brilliant scarlet. The flesh is unusually thick, and in well-developed fruits measures five-eighths of an inch in thickness, surpassing any other sweet pepper. Pkt. 10c; ½ oz. 20c; oz. 35c; ¼ lb. \$1.25.

New Earlibell Tomato

First on the Market—First for the Highest Prices.

Earlibell is earlier than any other sort. In comparative tests with Earliana, seed sown at the same time and plants set out at the same time, the Earlibell gave ripe fruit five days sooner. Earlibell is surprisingly productive. No variety is more uniform in shape or ripens so evenly. Its color is a beautiful, deep glossy scarlet, and is very attractive. The table quality is surpassed only by the large beefsteak sorts. Its flavor is all that can be desired. Ready for market in 85 days. Extra Selected Seed. Pkt. 10c; ½ oz. 25c; oz. 35c; ¼ lb. \$1.25; lb. \$4.50 prepaid.

Boys and Girls Can Make Money

We have put up most of the leading varieties of Flower Seeds in fine lithographed packets showing the flowers in their natural colors. These sell readily at 5c and 10c a packet. We will mail 100 packets of the best selling sorts of our selection for \$2.50.

Onion—Mountain Danvers

The Best Keeping Onion of All.

The earliest Yellow Globe variety. Ripens early and is very hard and solid, without any thick neck. Is of good size, of globe shape like the Danvers Yellow Globe, but slightly darker yellow color. The crop ripens evenly, without any scallions, and will keep with less shrinkage or loss from any cause than any other Onion. We recommend it for market and home garden. In many of the Onion growing sections of the Middle West and West, it is the leading sort. Pkt. 10c; oz. 25c; ¼ lb. 70c; lb. \$2.25, prepaid.

2 Good Spinaches

Giant Leaved Longstanding Gaudry.

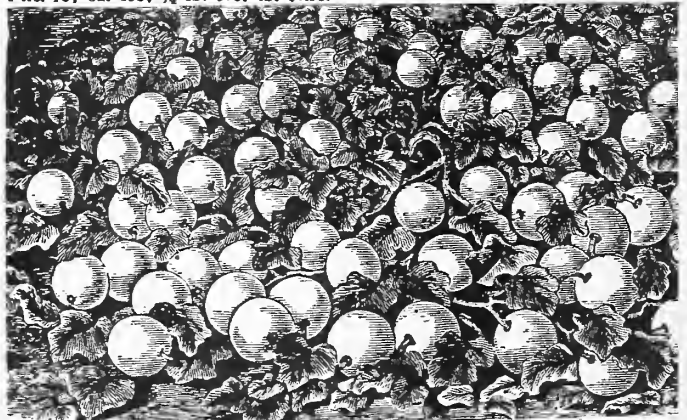

Grows as quick as the other early smooth-leaved varieties but is far superior on account of standing up much longer. Leaves are very large, broad and thick. Sold by some firms under the name of Nobel Spinach. An excellent variety that is destined to become a leading sort. Pkt. 5c; oz. 15c; ¼ lb. 40c; lb. \$1.00.

Reselected Bloomsdale Longstanding

In appearance quite similar to the Bloomsdale strain, of a little more compact growth, leaves a more intense green, in fact the deepest dark green we have ever seen. It stands heat remarkably well. When other kinds have bolted to seed, it does not show the least inclination to shoot and will stand up and remain in prime condition for several weeks. This variety seems destined to supersede many old sorts. Pkt. 5c; oz. 15c; ¼ lb. 35c; lb. 95c.

New Straightneck Summer Squash

In earliness and quality it is almost identical with the Golden Summer Crookneck. Its greatest advantage is that it can be packed for shipment better since it is straight. It grows 18 to 20 inches in length, deep orange in color with a thick meaty neck of the finest quality. Pkt. 7c; oz. 15c; ¼ lb. 50c; lb. \$1.75.

A species of Muskmelon about the size of oranges. Fine for preserves or pickling. Pkt. 5c.

Table Queen Squash

You will be pleased not only with the taste and cooking quality of this Squash, but you get so many from each seed planted, the vines being so vigorous and productive, that it pays to plant a few in your garden. The fruits are a nice size to handle, 6-8 inches long and 4-6 inches in diameter. The shell is hard and smooth, so that they keep as well as the Hubbard. The color is dark green with sometimes a blotch of red at pointed end. Table Queen ripens in the fall. Pkt. 10c; 1 oz. 35c.

Hard Shell Warty Hubbard

This is an extra sweet, hard shelled strain of the popular old Hubbard. The large warts always indicate a good Squash. The hardest, best keeping, dryest and sweetest of all. Pkt. 5c; 1 oz. 12c; $\frac{1}{4}$ lb. 40c; 1 lb. \$1.25.

Fordhook Squash

Productive variety with fruits 8 to 10 inches long, oblong in shape, smooth yellow skin. Flesh light yellow and of fine flavor. Banana Squash

More Prolific and Better than Hubbard

This Squash is a heavy yielder and one of the best all-purpose variety ever grown. Can be used when quite young and will keep splendidly for a Winter Squash. The color is grayish-green, shell soft, so that it can be cut with a knife. It grows from 18 to 30 inches long and 6 to 9 inches in diameter. It is very prolific, but a shy seeder. Flesh is of high color, entirely free from stringiness or fibre. Cooks up perfectly smooth and is of most delicious flavor. Yields well and is of such superb table quality that many growers will have no other for their own use. Matures rather late and should be planted early if very large fruits are desired. The Grand Old Favorite. One of the best winter squashes; flesh bright orange yellow, fine grained, very dry, sweet and rich flavored; keeps perfectly good throughout the winter; boils or bakes.

Exceedingly dry and is esteemed by many to be as good baked as a sweet potato. Our stock is most carefully selected with regard to quality of the flesh and color and wartiness of the shell; but the latter peculiarities are largely determined by the soils in which the Squashes are raised. Pkt. 5c; 1 oz. 10c; $\frac{1}{4}$ lb. 35c; 1 lb. \$1.20.

Golden Hubbard

A form of the Hubbard similar to the green Hubbard. Preferred to the green Hubbard by some. Color a rich deep orange yellow on outside and similar to green Hubbard inside. Pkt. 5c; 1 oz. 8c; $\frac{1}{4}$ lb. 35c; 1 lb. \$1.10.

SPINACH

New Triumph Spinach

Plants are of very compact but prostrate growth. They are composed of many short-stemmed leaves, which are of much thicker and heavier texture than most other Spinach. They are heavily crumpled and blistered, of dark green color, and do not wilt or run to seed as quickly as most other sorts, but will remain in good marketable condition a month. On account of its thick, firm leaves it retains its freshness during the hot summer months. It is the best variety to be sown in the spring, and also continuously at intervals all summer, so that this delicious, healthful vegetable can be enjoyed, not only during the cool weather, but during the hot months as well. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 50c; 2 lbs. for 90c.

New Zealand Spinach

Unlike true Spinach in type in that it thrives during hot weather and in any soil rich or poor. The tender shoots are of good quality and may be cut throughout the summer. The plant becomes very large and spreading. The leaves are comparatively small, broad and pointed. Plant three or four seeds in hills two feet apart each way. Germination of the seed can be hastened by soaking in warm water twenty-four hours. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; lb. 65c; 4 lbs. \$2.00.

Princess Julian

Large, rich crumpled, dark green leaves. Keeps in condition to use longer than others. Pkt. 7c; oz. 15c; ¼ lb. 40c; lb. 95c.

Big Crop

In the parts of Europe where Spinach is an important article of food "Big Crop" is recognized as one of the very best varieties. As the name implies, it produces a large crop and the quality is equal to the best. We predict a large sale for it in a few years when its superior value becomes known. Pkt. 5c; oz. 12c; ¼ lb. 28c; lb. 75c; 2 lbs. \$1.30.

Bloomsdale Savoy Spinach

Bloomsdale Savoy Spinach

This sort is known also as Norfolk Savoy Leaved. It is a very early variety and one of the best to plant in autumn for early spring use. The plant is of upright growth, with thick, glossy, dark green leaves of medium size, pointed but quite broad, and crumpled or blistered like those of Savoy Cabbage. It is hardy and grows rapidly to a suitable size for use, but runs to seed quickly in warm weather. Suitable for the home or market. Pkt. 4c; oz. 8c; ¼ lb. 15c; lb. 45c; 3 lbs. or over 38c per lb. by mail.

All Seasons Thick Leaved Spinach

This plant is small, with lustrous green leaves, which are short, broad, very thick, and of so great substance that they lose less bulk cooking than any other. The plant forms a compact, dense rosette perfect in color and substance, and unequalled in flavor. Remains in fit condition to use longer than any other. Pkt. 5c; oz. 9c; ¼ lb. 15c; lb. 45c; 3 lbs. or over 38c per lb. by mail.

King of Denmark Spinach

This new variety will eventually replace others for spring planting, as it is very slow to go to seed, continuing to grow and hold its fine quality for weeks after all other sorts have gone to seed. It makes a very quick and low growth, producing an abundance of dark green leaves which are of large size and attractively crumpled. It is ready for use as soon as other varieties of spinach, and the leaves hold up remarkably well after being cut. The quality is excellent and we consider it one of the most valuable additions to the vegetable greens that has been made in recent years. It is nearly twice the size of the others and equally as good quality as any. Pkt. 5c; oz. 10c; ¼ lb. 25c; lb. 60c.

Victoria Spinach

An excellent variety, forming very large, exceedingly thick, very dark green leaves slightly crumpled in the center. The plant is large and compact. This variety becomes fit for use nearly as early as any, remaining much longer than most kinds. It is desirable for the market or home garden. Pkt. 5c; oz. 9c; ¼ lb. 15c; lb. 45c; 4 lbs. \$1.50 by mail.

Very firm fleshed, with few seeds, ripens evenly. Color a very fine glossy rose, tinged with purple. Flavor is extremely delicate and agreeable, and the plants are extremely productive, being loaded throughout the season. Pkt. 5c; ½ oz. 13c; 1 oz. 25c; ¼ lb. 80c.

Improved Stone

One of the largest and most solid, main crop or late bright red varieties. It is unsurpassed for slicing and canning. The vines are large, vigorous and very productive. Earlier than Chalk's Early Jewel. A vigorous grower, enormously prolific. Color is intense scarlet. Shape is perfect and remarkably uniform in size. Mrs. J. E. Olson, Saskatchewan, Canada.

I must express my appreciation to you for the fine success I have had with your seeds and for such reasonable prices.

Mrs. C. A. Barker, Westfield, Ind.

Earliana Tomato

Special Selected Strain

The Earliana has for several years been the standard extra early. Our grower has worked up a special strain of this, improving it in every possible way. Our strain of this first early sort is earlier and decidedly superior to much that is sold as Sparks' Earliana, and the extreme earliness of its large, smooth fruits makes it a very desirable Tomato for market gardeners, as well as desirable for the home garden. The vines are small, but vigorous and productive. The fruits are scarlet, medium to large, nearly round and exceptionally smooth for so early a variety. The fruits are borne in clusters near the base of the plant and the bulk of the crop ripens very early. Pkt. 5c; ½ oz. 14c; oz. 25c; ¼ lb. 90c; lb. \$3.00.

Small Tomatoes

If you like the small fruiting sorts for preserves, etc., order Cherries, Pears and Plums Mixed at 5c a pkt. We do not have these separate.

I find you the most satisfactory seedsmen I ever dealt with.

Albino or White Beauty

A pure white tomato, good size and free from acid, which makes it a pleasant variety to eat raw. Pkt. 15c; oz. 60c; ¼ lb. \$2.00.

Crimson Cushion

Crimson Cushion is a scarlet "sport" from Ponderosa, and resembles the original stock in nearly all respects, but the color is brilliant crimson-scarlet. It bears a prodigious crop of perfectly shaped fruits of enormous size that ripen clear to the stem, while its rich color is sustained throughout the entire fruit. It ripens a few fruits immediately after the very early sorts, and from then right up to frost it yields a constant supply of massive, luscious fruits. These are always extremely solid, and remain so after cooking. In flavor it is appetizing and delicious. Pkt. 10c; 3 pkts. 25c; oz. 65c; ¼ lb. \$2.25.

Gulf State Tomato

Although this variety was developed primarily to meet the demands of tomato growers, who ship to distant markets, its many excellent qualities make it also a very desirable sort for the home gardener or the growers for local markets. Fruits medium to large, round or globe-shaped, show but little depression about stem and are smooth and free from cracks. Color deep purplish pink ripening well about the stem. The skin is firm and the flesh solid. Unsurpassed by any as a shipping variety and one of the most desirable home or market garden sorts. A much improved variety of Early Detroit. Pkt. 10c; 3 pkts. 20c; oz. 30c; ¼ lb. \$1.00; lb. \$3.50.

Similar to Ponderosa except in color which is a clear yellow. This giant Tomato is one of the best large yellow varieties. Somewhat scattered on the vine and a small percentage are rather rough. Pkt. 8c; ½ oz. 15c; oz. 30c; ¼ lb. \$1.00.

Beefsteak Tomato

The name Beefsteak has been given to several Tomatoes, which are especially noted for a solid, meaty core and unusually large size. The Beefsteak Tomato possesses these good points—heavy, solid, fine flavored, meaty flesh, etc., and is, we think, one of the best varieties grown. Vigorous grower, very productive and continues to produce large sized fruits until frost. Its luscious fruit is large to extra large, very meaty and solid, with few seeds. Its color is a brilliant shade of red and one of the most beautiful Tomatoes we have ever seen. Foliage heavy, protecting the fruit from sunscald during late summer. Pkt. 10c; ½ oz. 15c; oz. 25c; ¼ lb. 90c; lb. \$3.25.

GREENHOUSE or HOUSE PLANTS SEED

PERENNIAL FLOWER SEEDS

Perennial or hardy flowers have rapidly gained in popularity during the last few years. Perennial borders are now seen everywhere. We grow over a thousand varieties in our trial grounds. Our list comprises the best perennials grown which for ease of culture, freedom from disease and continuous blooming qualities cannot be excelled. Seed often does not germinate as rapidly as that of annuals. We have best results when the seed is sown early in the spring in well prepared soil or better still in a window box where temperature and moisture may be kept even. Then the plants attain sufficient size before fall to withstand the winter. Sow Hardy Phlox and Wild Cucumber in the fall and they will come up the following spring.

Order Flower seeds by the number placed before them. We can fill the order just as correctly as though you wrote the entire name.

FEED YOUR PLANTS THIS SIMPLE, EASY, PLEASANT WAY

**Air-Nitrogen Fertilizers Are Rich in Plant-Food
Clean to Handle—Easy to Apply**

These new air-nitrogen fertilizers are the gift of modern science to the farmer and the home owner. They are three to four times as rich in plant-food as the ordinary commercial fertilizer. They are as clean as sugar to handle, and they are absolutely free from weed seeds, and all obnoxious odors. They can be applied easily, in a few minutes, to any lawn or garden of ordinary size—because "a little goes a long way." You will be amazed at the results. You will be proud of your thick, velvety lawn, your beautiful flowers and your tender, luscious vegetables. And the cost is so little.

NITROPHOSKA

15-30-15

The Concentrated Complete Fertilizer

Nitrophoska contains all of the three essential plant-foods—nitrogen, phosphoric acid and potash—concentrated in one material. It has 15 percent of nitrogen, 30 percent of phosphoric acid and 15 percent of potash—all of which is soluble and easily available for rapid, sturdy growth.

A little Nitrophoska fertilizes a great deal of ground. Five to ten pounds of Nitrophoska (depending upon the natural richness of the soil) is enough to fertilize 1000 square feet of lawn or garden. It may be spread broadcast by hand; dissolved in water and applied with a sprinkling can; or mixed with such materials as peat moss and humus before applying.

Nitrophoska, being a well-balanced, complete fertilizer, produces strong and vigorous growth of rich green color, able to bloom and bear to the utmost. Apply it to lawns and shrubbery and all perennial plants in the early spring as soon as growth starts. For vegetables and annual flowers, work it into the soil before planting.

FLORANID

Floranid is a very rich nitrogen fertilizer (46% nitrogen), used principally during the growing season to obtain more rapid growth, richer color of foliage and greater brilliancy of bloom. The nitrogen in Floranid is in the same chemical form as in liquid manure. Twenty-two pounds of Floranid contains as much nitrogen as a ton of manure. One pound of Floranid is enough for one application to 1000 square feet of lawn or garden.

Seeds of all legumes—Clovers, Alfalfa, Beans, Peas, Vetches, etc.—will yield far better results if inoculated with **Humogerm**, and in addition leave in the soil a heavy deposit of nitrogen which benefits all succeeding crops. No other inoculant will produce the wealth of nodules obtained by using **Humogerm**. Demand for it grows greater every year.

PLANTABBS

ODORLESS PLANT FOOD TABLETS

The guaranteed high analysis of nitrogen 11%, phosphoric acid 15%, potash 20%, all of which are water soluble, assures Plantabbs of being a complete, properly balanced fertilizer. Ideal for house plants where smelly fertilizer cannot be used. Makes REPOTTING UNNECESSARY as Plantabbs replenishes the food consumed by the growing plant.
